NOTE TO BIDDERS:

No set volume of work is intended to be guaranteed and the estimated quantities shown above are for purposes of determining the low bidder only.

If the actual quantities during the Contract/Agreement period are less than or greater than what is identified, the unit rates shall remain unchanged. Compensation to the Contractor shall be at the unit rates set forth above as bid by the Contractor.

The Department reserves the right to award this contract in whole or in part. The Department does not guarantee any minimums or maximums on this Contract/Agreement.

The Contractor named below agrees that if this Contract/Agreement is renewed, it shall be renewed for the same price, terms, and conditions as set forth in the original Contract/Agreement.

A Unit Rate must be submitted for each item number. If the Contractor does not charge for an item, "0" shall be inserted. If any items are left blank, the bid shall be considered as non-responsive.

The Florida Department of Transportation and the Contractor shall negotiate items of work that are not included in the unit price schedule as required by the work assignment.

Each project, as defined by the Florida Department of Transportation, shall be negotiated as a total sum based on the bid items and prices listed above (by multiplying the actual number of units for the work description by the unit prices, as specified above). When a total sum cannot be reasonably determined, the Florida Department of Transportation shall negotiate a maximum amount based on the unit prices and the Contractor shall bill as allowed by the Letter of Authorization.

Payment will be made upon satisfactory completion of each "Letter of Authorization." Payment in full of a work authorization amount shall be made by the Florida Department of Transportation upon completion by the Contractor of all work required to be performed under the terms of the Contract/Agreement and acceptance of the work by the Florida Department of Transportation.

The Contractor understands and agrees that work provided herein shall not be considered complete until the final TEM (Transmission Electron Microscopy) clearance air samples indicate presence of 0.01 or less asbestos structures per cubic centimeter in accordance with the monitoring requirements prescribed by rules of the Former Florida Department of Labor and Employment Security (FDLES).

LOW BIDDER WILL BE DETERMINED BY GRAND TOTAL PRICE AMOUNT AND IS NOT TO BE CONSIDERED THE CONTRACT AMOUNT.
