Re: Sole Source for Service of Honeywell UL Listed EBI Fire System

Dear Joe,

The existing Honeywell fire alarm command and control system (EBI) referenced above is a proprietary product of Honeywell HBS. All campus fire alarm and security panels are monitored and controlled by the current EBI in the Police Services building. The EBI software is hosted on redundant servers and is part of a dedicated network providing life safety and security monitoring/control for the campus.

The present systems were installed by factory trained Honeywell HBS technicians. Honeywell service technicians are familiar with the system's components. Our technicians have access to all Honeywell literature, technical bulletins, and system update information, as well as support from our Technical Assistance Center (TAC) and Engineering Centers.

Honeywell is the only provider that employs the necessary personnel who are certified to work on these systems.

Please let me know if we can answer any questions or if we can be of further service to you.

Sincerely,

HONEYWELL INTERNATIONAL, INC.

Darin Sperry
