

Crystal River (WEST CENTRAL)

The Crystal River Readiness Center currently has barbed wire fencing surrounding the western, eastern and northern perimeters leaving the front southern perimeter of the Armory opened and exposed.

An estimated request of 793 linear ft. (8 ft. high) security barbed wire top chain link fencing with anti-ramming cables will be placed along the southern perimeter connecting to the existing fencing on both west and eastern perimeters.

A section of the current fencing along W. Venable Street will be removed.

Single cantilever sliding chain-link gates will be placed at two locations south of the Armory parallel to W. Venable Street with no more than 2 inch spacing between the bottom of the gate and ground. **NO K12/K8 fencing/gates will be placed at this site.**
