DATE: May 13, 2019

BID No. and Title: DOT-ITB-19-3079-WE: Electric Key and Access Control System For Intelligent Transportation System Field Cabinets

**Questions And Answers**

**Question 1.**

We request a minor change on Line Items 10 and 11 of the Bid Sheet. The Vendor Responsibilities in Exhibit A, Technical Specifications, Vendor Responsibilities, Items 3 and 4 clearly define the CyberLock Enterprise system. The corresponding BID Sheet, Exhibit B, Line Items 10 and 11 identify the correct item and description, SWL-CAW -50 and SPT-CAW. The word Basic needs to be removed from each line item to bring both line items into conformity with Exhibit A descriptions.

**Answer 1.**

**See Addendum No. 1**

**Question 2.**

The majority of Line Items are readily available as standard items from CyberLock, Inc. As such, the Florida Department of Transportation can expect delivery of these ordered items within 7-10 business days. However, several of the items are custom cylinders and require confirmation from the factory at CyberLock, Inc. as to lead time for manufacture and delivery of these items. Since the lead time can range from six to twelve weeks, we would appreciate your guidance on how to respond and meet the expectations of the Department.

**Answer 2.**

**See Addendum No. 1**
