ADDENDUM NO. 1  DATE: April 28, 2017

RE: BID/RFP #: (RFP-DOT-16/17-9043-CA)

BID/RFP TITLE: (Connected Vehicle Signal Phasing and Timing Deployment Project)

OPENING DATE: (May 11, 2017 at 3:00PM LOCAL TIME)

Notice is hereby given of the following changes to the above-referenced BID/RFP:

Q&A – Written responses to written inquires.

Bidders/Proposers must acknowledge receipt of this Addendum by completing and returning to the Procurement Office, by no later than the time and date of the bid/proposal opening. Failure to do so may subject the bidder/proposer to disqualification.

Cassandra Anderson
Procurement Agent

Failure to file a protest within the time prescribed in Section 120.57(3), Florida Statutes, or failure to post the bond or other security required by law within the time allowed for filing a bond shall constitute a waiver of proceedings under Chapter 120, Florida Statutes.
Question: 1

The Bid Sheet calls for a price for “2,100 linear feet attachment cable for Remote Road Side Unit Antennas.” The RSUs we will be proposing have antenna mounted on the RSU. There is no need for attachment cable. Do you still want us to quote the cable?

Answer: 1:

FDOT requests the antenna be mounted out on the horizontal arm over the travel lane and the RSU mounted on the vertical arm of the mast arm pole, and therefore the cable between them needs to be quoted.

Question: 2

Two communication (data) cable connectors come with the RSUs we will be proposing. Do you still want us to quote 100 of these connectors?

Answer: 2:

Please quote for the connectors as requested.

Question: 3

The antenna is also included with the RSU we are proposing and will be connected. Did you want us to quote the 100 antenna connectors?

Answer: 3

See response to Question 1. Please quote as requested in the bid sheet.

Question: 4

The power connector is already included in the data cable. Did you still want us to quote these?

Answer: 4

Please quote for the connectors as requested.

Question: 5

Page 13 of 43: Section 9.5.1 States types of proposed devices include traffic controllers along with RSE equipment, however, controllers are not on bid sheet and this contradicts Exhibit “A” working saying the RSE system shall work with Intelight 2070 LDX controllers. Also – can firmware be changed in the 2070 LDX controllers for the RSE solution to work (i.e. non-Intelight 2070 firmware)?
**Answer: 5**

The bid sheet does not include the traffic signal controllers because the RFP does not call for them. Section 9.5.1 mentions the components of the test platform at the Traffic Engineering Research Laboratory. Exhibit A indicates that the vendor will ensure that the RSE system works with Intelight 2070 LDX controllers. No, the firmware cannot be changed.

**Question: 6**

Page 22 of 43: Section 30.2 – TERL testing – When will the short-listed RSE vendors get the FDOT supplied USDOT Intersection MAP version and SPaT Message Center Creation tool? How long prior to the TERL testing or is it implied that it will be supplied only during the test?

**Answer: 6**

The USDOT MAP tool data for the two TERL intersections will be provided upon shortlist. The details of the USDOT tool can be accessed using the link provided on page 14 of 43; Section 9.7 Qualitative Standards and Criteria; #11 USDOT Intersection MAP and SPaT Tool.

**Question: 7**

Page 18 of 43: Section 22.2 Technical Proposal, Part 2. Proposers Management Plan – what exactly is to be shown in the administration and management play? Specific tasks and required documents are not defined in this RFP. Timelines of deployment and milestones are not specifically stated in the schedule, other than submitting equipment within 30 days and providing certain hours for configuration assistance and training. PSEM/Con Ops and RTVM are not supplied. Are there specific requirements for the intended staff (admin, technical, training, etc)?

**Answer: 7**

As stated in the Proposer’s Management Plan; Administration and Management, section of the RFP, the Proposer may provide information on organizational structure such as the main point of contact (Project Manager), a brief approach to the delivery and all components stated in the RFP including but not limited to warranty, telephone/technical/troubleshoot support, training etc along with their qualifications. The project is effective through October 2018; hence the selected vendor shall make appropriate provisions to meet the project scope. The Proposer may wish to provide any information at their discretion.
