Justification for single source acquisition (what is necessary and unique about the product, service or source; steps taken to confirm unavailability of competition, as appropriate):

After independent ballistic testing over the last 3 years, the Department has determined that the Speer GDHP bullet is the most effective type of ammunition available for our Department due to its high weight retention ratio and penetration when fired through auto metal and also less bullet deformity when fired through auto glass which comprises a large portion of our encounters when firearms are used. When fired through heavy clothing the bullet has perfect expansion and does not over-penetrate. In comparison, other products do not perform as well given the unique situations our Troopers find themselves in daily.

Florida Bullet, Inc. is the only factory authorized Law Enforcement Distributor of Speer products in the State of Florida.

Approved By (names & titles, as appropriate, e.g., requestor, requestor management, information systems, budget, purchasing):

Major Nancy Rasmussen, Academy Director, Florida Highway Patrol
Frank Frink, Division Armorer, Florida Highway Patrol
